

M00000103
Fiber optic stripper, CFS-2, Ripley
Miller

Description

This fiber optic stripper from Ripley Miller has two notches in the blade. It easily strips 250 µm or 140 µm primary coating down to 125 µm bare fiber. All stripping surfaces are made of high-quality materials to ensure clean and smooth strips every time. The blade recesses are factory-set and require no adjustment. As a result, the fiber is not scratched or nicked during use. The thermoplastic elastomer handles are ergonomically designed to fit comfortably in either hand, reducing the risk of strain or injury.

Brand

Ripley Miller

General information

Material pliers	Micro-toothed stainless steel
Material handles	Plastic
Length	165 mm
Weight	119 g
Application hole 1	1.6 - 3mm sheath, 900 µm tight buffer
Application hole 2	900 µm tight buffer & 250 µm buffer coating, 125 µm bare fibre
