Circular Economy

Undertaking applies circular economy principles: Yes

Maunt applies circular economy principles through practical initiatives focused on reuse, repair, maintenance and waste reduction. The company extends the lifetime of equipment by offering repair and maintenance services, helping to prevent premature replacement and reduce material use. In its logistics process, Maunt also reuses packaging materials where possible. In addition, wooden slats from reels are re-used by a partner on the industrial estate. Finally, waste streams such as cardboard, paper, confidential paper and residual waste are collected separately to support appropriate processing and recycling.
