

M00000028

Dismantling tool, coax, Knipex

Description

This dismantling tool from Knipex is used for stripping insulation from coaxial cables (RG 58, RG 59 and RG 62). You can use this hand tool to strip off the Outer sheath, shield and core insulation in one movement. The tool has three built-in blades. The cutting depth can be adjusted individually for each blade with an Allen key. The blade spacing remains constant. The tool is made of plastic.

Brand

Knipex
