Diagonal cutters, Knipex, 140mm

Description

Knipex diagonal cutters have precision cutting edges, making them the ideal solution for use when cutting soft and hard wires. The cutting edges are inductively hardened, which ensures clean cuts on thin Cu wires, even at the tips of the cutting edges. The pliers' slim head shape makes hard-to-reach work areas easily accessible. The head of the pliers is made of oil-hardened and tempered electrical steel and the legs are coated with plastic.

Brand

Knipex

General information

Material pliers	Vanadium electrical steel
Material handles	Plastic
Cup	Polished
Length	140 mm
Weight	126 g
Cutting value hard wire	1.8 ø mm
Cutting value medium-hard wire	2.5 ø mm
Cutting value soft wire	4.0 ø mm
