Diagonal cutters, 160mm, Knipex

Description

These side-cutting pliers are suitable for versatile use. The pliers are made of high-quality material and have a precise finish for a long service life. The precision cutting edges are suitable for soft and hard wire. The diagonal cutters always make neat sides at the tips of the cutting edges, even on thin copper wires. The cutting edges are extra inductively hardened. The hardness of the cutting edges is approx. 62 HRC. The diagonal cutters have a slim head for use in hard-to-reach places. The head of the pliers is made of vanadium electrical steel. This steel is oil-hardened and tempered. The legs of the pliers are plastic-coated. This ensures that the pliers sit comfortably in the hand and have a long service life.

General specifications

Cup	Polished
Material head	Vanadium-electro steel, forged, in oil hardened
Legs	Plastic-coated
Length	160 mm
Width	79 mm
Height	14 mm
Weight	166 g
