Diagonal cutters, Knipex, 125mm

Description

These universal diagonal cutters from Knipex are made of high-quality material and have a precise finish, ensuring a long service life. It has precision cutting edges suitable for cutting soft and hard wire. The side-cutting pliers make perfect cuts without a facet. In addition, it is also possible to cut flat wires from Ø 0.2 mm with these pliers, thanks to their slim head. The cutting edges are additionally induction-hardened. The steel of these pliers is oil-hardened and tempered. The pliers' legs are coated with plastic. This ensures that the pliers are comfortable in the hand and have a long life.

Brand

Knipex
