

MAUNT

M00000077

HDPE duct, 16/13mm, orange, 2500m, Maunt

Description

This HDPE fiber optic protection duct is solid-walled, smooth on the outside and uniform in color, and free from blisters, scratches, voids, holes, contamination or other defects. The duct is used to protect cables in underground and above-ground applications.

Brand

Maunt

Physical specifications

Material	100% HDPE, solid wall, virgin material
Density	≥945 kg/m ³ according to ISO 1183
Duct diameter	Minimum 16.0mm and maximum 16.3mm
Wall thickness	Minimum 1.25mm and maximum 1.75mm
Color	Orange
Ovality	Maximum 3%
Printing	None

Environmental specifications

Processing temperature	Between -10°C and +50°C
Storage temperature	Indoors, between -20°C and +60°C

Classification codes and standards

Pressure resistance	Maximum 16 Bar
---------------------	----------------

Logistics specifications

Packaging quantity	Reels (ø800mm) of 2,500 meters
