

M00000101**Glass fibre stripper 2-hole, FO103D-250, Ripley Miller****Description**

This fibreglass stripper FO103D-250 from Ripley Miller has two holes in the blade and efficiently removes sheathing from 1.6 to 3 mm or 900 microns of tight buffer and 250 microns of buffer coating from 125 microns of bare fibre in one compact tool. This glass fibre stripper is factory set and does not require adjustment by the assembler. The dismantling tool is manufactured very precisely and the 2 holes in the blade allow you to strip accurately and cleanly, without damaging the glass fibres. The swivel pin, spring and handles improve the functionality and durability of the stripper.

Brand

Ripley Miller

General information

Material pliers	Micro-toothed stainless steel
Material handles	Plastic
Length	137 mm
Weight	71 g
Application 1 ^e opening	900 µm tight buffer, 250 µm buffer coating
Application 2 ^e opening	250 µm buffer coating, 125 µm bare fibre
