Glass fibre stripper, FO103-S, Ripley Miller

Description

This fibreglass stripper FO103-S from Ripley Miller has one opening and efficiently removes buffer coating from bare fibres. The stripping tool is factory set and requires no further adjustment by the assembler. The fibreglass stripper is manufactured very precisely. The front opening and the V- openings in the blade ensure that the fitter can accurately and cleanly strip bare fibres without scratching them. The stripper's precision handles and rotary mechanism enhance its functionality and durability.

Brand

Ripley Miller

General information

Material pliers	Micro-toothed stainless steel
Material handles	Plastic
Length	137 mm
Weight	71 g
Diameter opening (blade)	For stripping 250 µm buffer coating from 125 µm optical fibre
