Glass fibre stripper, CFS-3, Ripley Miller

Description

This fibreglass stripper from Ripley Miller is one of the most widely used tools among fibreglass fitters. The tool is suitable for stripping 250 µm primary coating back to 125 µm glass fibre. In addition, it is also suitable for stripping 900 µm secondary coating back to 250 µm secondary coating and for stripping patch cable of 2 or 3 mm back to 900 µm secondary coating. The pliers are factory set and therefore do not require further adjustment. The handles are ergonomically designed to fit comfortably in the hand, reducing the risk of injury.

Brand

Ripley Miller

General information

Material pliers Material

Micro-toothed stainless steel

handles Length

Plastic

Weight

165 mm

Application 1^e opening

119 g

1.6 - 3mm sheath, 600 - 900 µm tight buffer
