Glass fibre stripper, FO103-S-200, Ripley Miller

Description

This fibreglass stripper from Ripley Miller has a single blade opening and efficiently removes the buffer coating from bare fibres. The blade is already set and requires no further adjustments by the user. The design of the blade is very precisely manufactured and prevents scratching and kinking of the fibreglass cable. The coated handles improve the functionality and durability of the dismantling tool. The stripper is suitable for stripping our 96-gauge microduct cable. It can also be used to strip other microduct cables.

Brand

Ripley Miller

General information

Material pliers	Material	Micro-toothed stainless
handles	Length	steel Plastic
Weight		137 mm
Diameter opening (blade)		71 g
		200 µm
