M00000198

Connector cleaner, Cletop-S reel cleaner, type B, white tape, Cletop

Description

Reel cleaner for dry cleaning of ferrule end faces of optical connectors. The microfibre cleaning tape is held in a replaceable cartridge that is easily placed in the housing. One push of the lever advances a clean section of tape; the cleaner is suitable for both left-handed and right-handed operation. Thanks to its anti-static properties, dust does not reattach to the ferrule after cleaning. Intended exclusively for cleaning ferrule end faces; the cleaning result may depend on the environment and the type of contamination.

Brand

Cletop
