

MAUNT

M00000198

**Connector cleaner, Cletop-S Reel Cleaner, SC, LC, FC, ST, MPO /MTP
(female)**

Description

In recent years, the power of optical communication light has become stronger. Because the light is trapped in an extremely small core of 10 microns diameter, the power density is very high. If a contaminant attaches to the core, it can burn and the heat can melt the core. To prevent the resulting communication failures, the connectors should be cleaned with the Cletop-S Reel Cleaner.

General information

Brand	NTT Advanced Technology Corporation
Type	Type B
Suitable for	MU, LC, MT, MPO/MTP (female), MT-RJ without pins,
Weight	Biconic 150 grams
Size (w x h x d)	125 mm x 85 mm x 35 mm
Cleans per cartridge Ferrule	More than 400 ø1.25mm
