

# MAUNT®

**M00000212**

**Cleaning fluid, SqueekyKleen Telcom Cleaner, 0.95l, Polywater**

## **Description**

SqueekyKleen Telcom Cleaner cleans and degreases optical fibers in two steps without leaving any residue. This cleaner is the improved successor to the HP cold cleaner. SqueekyKleen is gentler on the hands, and after using it no alcohol is needed to clean the fibers. It also reduces chemical odors and vapors. SqueekyKleen Telcom Cleaner helps keep splicers free of contamination, resulting in better fiber alignment and splice quality.

## **Brand**

Polywater

### Physical specifications

|             |                                                                                                |
|-------------|------------------------------------------------------------------------------------------------|
| Contents    | 0.95 litre                                                                                     |
| Composition | Hydrocarbons C10-C13, n-alkanes, isoalkanes, cyclics,<br><2% aromatics; (R)-p-mentha-1,8-diene |
| Shelf life  | 2 years                                                                                        |

### Physical and chemical properties

|                                         |           |
|-----------------------------------------|-----------|
| Boiling point                           | 185 °C    |
| Flash point                             | > 60 °C   |
| Evaporation rate                        | Medium    |
| Specific gravity (H <sub>2</sub> O = 1) | 0.79      |
| Residue                                 | < 100 ppm |
| VOC content                             | 792 g/l   |

### Environmental specifications

|                       |                                               |
|-----------------------|-----------------------------------------------|
| Operating temperature | -5°C to 50°C                                  |
| Storage instructions  | Keep container tightly closed when not in use |
