

MAUNT

M00000213

Dental probe, curved, stainless steel, 133mm, Maunt

Description

This curved dental probe is a hook-shaped hand tool with a hexagonal handle. The hexagonal shape provides grip and prevents the tool from rolling away. The material is non-magnetic, electrically conductive and does not corrode, so the probe can also be used with magnetised parts.

Brand

Maunt

Physical specifications

Material	Stainless steel, 300 series
Point	Semi-hardened, can be reshaped for specific applications
Total length	133 mm
Handle diameter	3.96 mm $\pm$ 0.08 mm
Pin diameter	1.22 mm $\pm$ 0.03 mm
Tip diameter	0.25 – 0.51 mm $\pm$ 0.03 mm

Logistic specifications

Country of origin	United States
