Splice protector, heat shrink (krimp), mini MMK-30, 30mm, bag of 50, Maunt

Description

This heatshrink (krimp) splice protector is used to protect the fusion splice. Once the splice has been made, the splice protector is slid over the spliced section of the fibre optic cable and placed in the oven. Inside the oven, the splice protector melts, hermetically protecting the spliced section. These splice protectors fit in the splice protector holder.

Brand

Maunt

Physical specifications

Heat-shrink material	Plastic
Strength member material	Stainless steel
Diameter	1.26 mm
Length	30 mm
Strength member diameter	0.5 mm
Strength member length	30 mm
Fibre size	250 µm

Logistics specifications

Packaging quantity	50 pieces
