

MAUNT

M00000449

Insulation tape, 25mm, transparent, 20m, Maunt

Description

This insulation tape is used for insulating, bundling and protecting electrical wires and cables in electrical installations and maintenance work. The transparent version is suitable when a transparent finish is required. The tape consists of a smooth, flexible soft PVC backing with a rubber-based adhesive layer. Thanks to its high elongation, the tape conforms well around cables and connections. The insulation tape is also used to mark cables or fuses that must not be switched on, to secure cable sheaths and to protect edges.

Brand

Maunt

Physical specifications

Backing material	Soft PVC
Adhesive	Rubber, solvent-based
Colour	Transparent
Width	25 mm
Roll length	20 m
Thickness	0.17 mm (170 µm)
Waterproof	Yes
Hand tearable	Yes

Environmental specifications

Temperature resistance	Up to 60°C
