Glass fibre stripper, adjustable, 1.2 - 6.4mm, Ripley Miller

Description

This fibre optic stripper from Ripley Miller can be used for stripping all types of FTTH flat drop cables. The tool is made of stainless steel and is very easy to use. This fibre optic stripper from Ripley Miller is used for making slots and annular cuts in fibre optic cables, buffer tubes and sheaths with a diameter of 1.2 to 6.4mm. The dismantling tool features easily adjustable blades, which ensure you can make very precise and reliable cuts. The stripper is safe, compact and has an ergonomic design. This ensures that the tool sits comfortably in the hand and prevents risk of injury. The fibreglass stripper is lightweight and has a compact size. The easily adjustable blade depth prevents fibre damage.

Brand

Ripley Miller

General information

Material	Impact-resistant polymer
Grips	Ergonomic
Length	53.3mm
Width	71.1mm
Height	12.7mm
Weight	22.96 g
Housing colour	Yellow
