

M00000948

**Fiber optic enclosure FMP hybrid, 48-fiber, 192ANT, 4mm,
windowcut, Attema**

Description

This hybrid FiberManagementPlate (FMP) is used in the Attema distribution closure for FTTH network deployment. The plate provides structured and protected routing of tubes and fibers to the pre-installed splice cassettes and is mounted by the splicing technician against the underside of the cover. Each of the 48 hybrid entry ports has an integrated strain relief and a watertight entry spout for the individual customer cable or duct; port numbers on the front and rear of the frame indicate the coding sequence. Entry spouts without a cable are sealed with a supplied universal blanking plug.

Brand

Attema

Physical specifications

Number of entry ports	48
Entry ports (diameter range)	ø3.0 - 8.0mm

Classification codes and standards

Protection/Environment	IP68
