

MAUNT®

M00001166

HDPE tube, 40/32.6mm, turquoise

Description

This HDPE fibreglass protection pipe is made of PE. The tube is full-walled, externally smooth and even in colour as well as free of blisters, scratches, cavities, holes, contamination or other defects. A longitudinal groove is fitted to the inside of the tube to reduce the resistance between cable and tube when inserting the cable, thus allowing blowing over longer distances. The tube is used to protect cables for underground and overhead applications. The colour of the tube is turquoise.

Brand

Maunt

Technical specifications

Material	100% HDPE virgin material
Density	≥ 945 kg/m ³ according to ISO 1183
Ovality	Maximum 3%
Pressure resistance	Maximum 16 Bar
Processing temperature	Between - 109C and +509C
Storage	Indoors, between -209C and +609C

Tube composition

Tube diameter	Minimum 40.0mm and maximum 40.3mm
Wall thickness	Minimum 3.25mm and maximum 3.75mm
Colour	Turquoise
Format	Reels (Ø800mm) of 2,500 metres
Imprint	No
Finish	Smooth, clean and even in colour, as well as free from blisters, scratches, cavities, holes, soiling or other defects. The pipe ends are smooth and squared.
