

MAUNT

M00001169

PE flex pipe, 110mm, roll 50m, turquoise

Description

The PE flex pipe, also called ribbed pipe or casing pipe, is ideally suited for laying curved sections. Thanks to its ribbing, the pipe is easy to bend. The ribbed Outer Sheath ensures very high skull pressure and the required static rigidity. The inside of the pipe is completely smooth, allowing cables and pipes to be drawn in effortlessly. The PE flex pipe can be installed both above and below ground or in concrete, for both cable protection and installation purposes.

Brand

Maunt

Technical specifications

Material	HDPE
Pressure resistance	450N

Tube composition

Tube diameter	110mm
Colour	Turquoise
