

M00001170

Warning ribbon fibreglass, 40x0.11mm, roll 250m, turquoise

Description

Warning ribbon 'Beware of Fibre Optics' is used for early detection of the presence of fibre-optic cables in the ground. The material is brightly coloured and elastic which makes the ribbon stand out well during excavation work, preventing damage to underlying ground cables during digging. The ribbon is made of high-quality polyethylene and produced according to the FTZ 564864 TV1 standard.

Brand

Maunt

Product specifications

Raw material	Polyethylene
Width	40mm
Thickness	0.11mm
Colour	Turquoise
Roll length	250m

Technical properties

Strength	>20N/mm ² (according to DIN 53455)
Stretch to fracture	>300%
Chemical resistance	25% Nitric acid
Processing temperature	-15°C to +80°C
