

M00001457

Diagonal cutter, 160mm, with bevel, Knipex

Description

These diagonal cutters from Knipex are suitable for versatile use. The pliers are made of high-quality material and have a precise finish for a long service life. The precision cutting edges are suitable for soft and hard wire. The side-cutting pliers always make neat cuts at the tips of the cutting edges, even on thin copper wires. The cutting edges are additionally induction-hardened. The hardness of the cutting edges is approx. 62 HRC. The diagonal cutters have a slim head for use in hard-to-reach places.

General information
