FS External coupling plate, H=110, RAL1023, Wibe

Description

Wibe's FS External Coupling Plate is a yellow cable tray designed to provide optimal cable organisation and is particularly suitable for use in data centres. Measuring 110 mm in width, this cable tray provides enough space to meet all your cabling needs. Manufactured from high-quality coated steel, this cable tray guarantees durability and excellent corrosion resistance. The specific design features of this cable tray are optimised to facilitate cables as longitudinal connectors in data centres. The closed construction provides protection against dust and dirt, allowing your cabling remains clean and orderly.
