Soldering iron 12 volts, Milwaukee

Description

This soldering iron 12 volt from Milwaukee has a fast warm-up time and can be used within 30 seconds. The soldering tips of this tool are interchangeable and the head can be set in 3 different positions (0°, 45°, 90°). The soldering iron features an LED light, which flashes green when the tool is heating up, green when it is ready to use and red when the tool is off but the head is still hot. So you can always work in a safe manner. In addition, the soldering iron also includes another LED light, providing more visibility while soldering.
