M00003000

Microduct, 14/10mm, ribbed, LSZH, white, Dura-Line

Description

Microduct made of halogen-free material with low smoke emission (LSZH), for use indoors and in confined spaces. The microduct has a ribbed inner wall without a special inner layer and is intended for blowing in micro cables. The microduct is compatible with standard microduct couplings and accessories.

Brand

Dura-Line

Physical specifications

Material	LSZH
Inner wall	Ribbed, without special inner layer
Color	White
Outer diameter	14 mm (nominal)
Inner diameter	Min. 9.68 mm
Weight	77 g/m (0.052 lb/ft)
Fill ratio	50% to 75% (recommended)
Marking	Permanent: material, standards, production information and sequential meter or foot marking

Mechanical specifications

Bend radius (during installation, unsupported)	279 mm (11 inch)
Bend radius (after installation, supported)	127 mm (5 inch)
Safe pulling force	1005 N (226 lbs), 80% of the breaking strength
Maximum blowing pressure	7.6 bar (110 psi)

Classification codes and standards

Standards	UL 1685-4; IEC 60754-1
Certification	ETL Verified (Intertek)
Fire safety	LSZH
