Patch panel, 19 inch, 1U, empty, gray, Fibrain

Description

Telescopic fiber optic patch panel of 1U for mounting in 19-inch frames. The panel slides out fully on telescopic rails, giving easy access to the splice cassettes from the front. The panel accepts splice cassettes for heat shrink splice protectors or ANT crimp protectors. The cable entries and a strength member holder are located at the rear. The front plates allow adapters to be mounted without screws and can optionally be locked with a key. The mounting brackets are adjustable and a patch cord management shelf can be added as an option. Supplied without front plate and accessories.

Brand

Fibrain
