Compressor KPM 14, Petrol, Screw, 1200l/min, 10 bar, KTC

Description

This compressor KPM 14 runs on petrol and has a tank capacity of 8.5 litres. The compressor is used in combination with a fibreglass blowing machine. This device is specifically suitable for the Fremco MicroFlow Log, the MicroFlow Touch and the Miniflow. The KPM 14 is equipped with a screw and is extremely suitable for heavy and larger work, where the KPM 3.5 falls short. The compressor is the only one in the market to feature an aftercooler. This ensures that the compressor is suitable for air blasting and chopping. It is a compact unit, which is easy to transport.
