Compressor KPM 27, Petrol, Screw, 2500l/min, 10 bar, KTC

Description

The KPM 27 compressor is compact and runs on petrol. The compressor is used in combination with a fibreglass blowing machine. The KPM 27 is specifically suitable for the Fremco MiniFlow. This compressor is equipped with a screw and suitable for continuous use. It also delivers 2500 litres p/m at 10 bar and includes an aftercooler, making it suitable for blasting/chopping on air. This compressor has a built-in option.
